DabarObjects Store Harmony Software  
[www.dabarobjects.com](http://www.dabarobjects.com)

- Internet compatibility.
- Can be deployed on any operating system (cross platform).
- Send Stock Via Internet
- Read Sales Summary online and SMS alert on daily sales summary

### **Benefits**

- It can take records of customer measurements and sizes
- Ability to take inventory of all items you want to sell in your store.
- Ability to easily identify items, due to their unique tag codes.
- It helps you plan your procurement trip by generating a chart of all items for you to print and use it to take inventory notes as you make procurement of various items.
- Ability to alert you when a stock is running low.
- Ability to print tagging codes that you can use to tag every item or the shelves, so that you can quickly identify every item in the shop.
- It makes it easy for some newly recruited sales person to know about every item in the shop.
- Security is maximized because you have the privilege to create access for 3 classes of people: an administrator (the manager), an inventory manager and a sales person. So therefore, if a user has a sales key then he/she cannot take inventory or alter the database.
- It can show you all your sales track of all items, and presents to you how much gross sales that you have made. You can also use a calendar to visualize trade for any particular date in the past.
- You can send SMS to all your customers, alerting them of new stocks. This can be done right from your computer using this software, so you don't have to pay extra for bulk messaging.
- It can help you track all the customers owing you.
- Accepts payments by cash, cheque, debit or credit cards etc, and it sends a reminder when your cheque is meant to clear.
- Once you log in, this software will tell you items that are the fastest selling in your store and also who your biggest spender is among all your customers.
- You can set various alert points for various items so that you get notified just when their quantity in the store has gone below that level.
- Sales are handled easily because it gives you various forms of navigators to locate a specific item that you want to sell and then it can help you prepare your receipt for your customer.
- And many more innovations coming for you at affordable rates
